

MISSION ADVANTAGE ANYWHERE · GRAB & GO

THE GRAB & GO COMM KIT.

Stay connected anywhere with a lightweight and rugged mobile comm suite. Keep your team talking to each other and reporting for the first 72+ hours, until infrastructure catches up.

OPEN THE CASE. GET ON THE PICTURE.

Two configurations: Mobile and Persist. Available mesh, satellite and cellular paths follow the PACE order (primary, alternate, contingency, emergency) you set before the mission. The kit shows which path is live and puts the team's position, status and observations onto the command and control picture the unit already watches.

THE GAP

In our 2026 site survey, an airliner reported an unknown object over the ramp. Without Anywhere: 22+ minutes, report still undelivered. With Anywhere: 41 seconds, patrol tasked with the object still in view, calculated from the instrumented mission timeline, not yet field measured. A rehearsal measures it on your site.

Teams disperse to austere and contingency sites, relocate a command post, or operate outside the network boundary, and for the first 24 to 72 hours they are limited to what one person can carry. **Anywhere is what that person carries.**

WHAT IT DOES

- Stands up a local team net in minutes, peer to peer, with no hub to lose.
- Follows the PACE order you set and shows which path is live.
- Lands position, status and observations in TAK (Team Awareness Kit), Envision, C2IMERA, MSS and Advana.
- Records the mission as it runs, so a rehearsal produces data instead of recollection.
- Adds no new command and control authority. Your systems stay the authority.

Order a kit. Run a rehearsal.

Name the team. We configure the kit and ship it. You open the case.

TWO CONFIGURATIONS. BUY AS MANY AS THE MISSION NEEDS.

Mobilefrom \$2,500

Take it with you. Stay connected. More than a phone: iPhone 17 Pro, Garmin inReach Mini 3 Plus satellite messenger, integrated charge case, storage, backup power and cabling. Provisioned and under device management. Charges closed, issued ready to use. Cellular, satellite direct-to-cell and satellite messaging.

Team add-on, +\$3,500 per Mobile kit. Team mesh radio, Starlink Mini low Earth orbit (LEO) terminal, common-battery power and tactical pack. Still one person carries it.

PRODUCT RENDERS

One Mobile kit fits on a government purchase card (GPC). Budgetary prices, October 2026. Every kit comes with a hardware bill of materials.

SPECIFICATIONS

SPECIFICATION	MOBILE	MOBILE + TEAM ADD-ON	PERSIST
Form factor	Pelican 1120 Protector Case	Mobile case and LEO terminal in a tactical pack	Rugged carry-on case
Dimensions	21.4 × 17.2 × 9.8 cm 8.41 × 6.76 × 3.87 in	Driven by the 29.9 × 25.9 × 3.9 cm LEO panel. Fits a 25 to 35 L pack	56 × 36 × 23 cm 22 × 14 × 9 in
Weight	0.98 kg (2.2 lb) case, device, messenger	2.1 kg (4.6 lb) excluding pack	11 to 25 kg (25 to 55 lb) by configuration
Power	Internal battery and power bank, USB-C. Charges with the case closed	Mobile power plus 25 to 40 W average for the terminal, 12 to 48 V	300 W bus. Power source configured for your mission
Endurance	Multi-day messenger reporting on 1800 mAh	99 Wh supports roughly 2.5 to 4 h of terminal-on time	Configured for your mission
Operating temp	Messenger -20 to 60 °C. Device 0 to 35 °C	Terminal -30 to 50 °C	-20 to 50 °C
Ingress	IP67 case and messenger	IP67 terminal with cable installed	IP67 sealed case
Aircraft carriage	Carried, not operated. Powered off in flight, all use off-aircraft. F-22 stowage is a dimensional and mass question only; no EMI or airworthiness qualification is in scope.		

TRANSPORT

Peer-to-peer mesh	Encrypted mobile ad hoc network (MANET), every mesh node routes	NOW
LEO broadband	Starlink Mini, 100 GB / month	NOW
Cellular	Unlimited with hotspot, rotating SIM identifiers	NOW
Direct-to-cell	Satellite messaging class	NOW
Satellite messenger	Position and text, off-network	NOW
Roadmap	UHF / VHF / HF, SATURN, LoRa, Wi-Fi HaLow	NEXT

Persistfrom \$20,000

The node that stays. Command communications center in a single-person carry-on: everything in Mobile, plus a local net head-end and persistent reach-back to the command and control (C2) picture. Bring your own radio, or buy it with an integrated Persistent Systems MPU-5 or L3Harris AN/PRC-163. Final fit by site survey.

PRODUCT RENDER

POSTURE

Status	Prototype. Unclassified baseline
Components	Established IL4 items, elements under USAF operational test review toward IL-6
Data handling	Managed service supports CUI today
This combination	New, and carries its own review. No authorization is inherited or claimed
Device management	Enrolls under an existing Electronic Flight Bag MDM program
Classified	Baseline is unclassified. SECRET is scoped after discovery
Measured	Time to restore the net, and time from edge observation to the C2 picture

Path to accreditation in place. Every component is individually replaceable.
