

Start with one Mobile kit at \$2,500.

The grab & go comm kit: a lightweight and rugged mobile comm suite for the first 72+ hours, until infrastructure catches up. Two configurations. Buy as many as the mission needs.

CONFIGURATIONS

from **\$2,500**

Mobile

Take it with you. Stay connected.

More than a phone: iPhone, Garmin inReach Mini satellite messenger, integrated charge case, storage and backup power, provisioned and under device management. Cellular, satellite direct-to-cell, satellite messaging.

Team add-on +\$3,500
per Mobile kit

Adds the team mesh radio for the team net, a Starlink Mini terminal for LEO (low Earth orbit) satellite reach-back, common-battery power and a tactical pack. Still one person carries it. Mobile with Team add-on: \$6,000.

from **\$20,000**

Persist

The node that stays.

Everything in Mobile, plus a local net head-end and persistent reach-back to the C2 (command and control) picture. Bring your own radio, or buy it with an integrated Persistent Systems MPU-5 or L3Harris AN/PRC-163. Final fit by site survey.

OPTIONS

Anywhere Radio. Configurable encrypted tactical data link, built to order. White label of the KForm Shield mesh radio. Adds to or replaces the Team add-on mesh radio. Included with each Persist. **\$5,000 and up**

Alt-PNT node. Alternate position, navigation and timing. Works when GPS does not. **\$3,300**

Additional end user device (tablet) added to a kit **\$1,320**

Low-probability-of-intercept and low-probability-of-detection pagers, tracking tags, hotspots **On request**

HOW TO BUY

Government purchase card (GPC). One Mobile kit fits on a government purchase card, with or without the Team add-on.

MIPR (Military Interdepartmental Purchase Request). For larger buys. Funds go to a contracting office that places the order.

Direct award. SBIR (Small Business Innovation Research) Phase III with Hadron as prime, or SDVOSB sole-source within federal dollar limits.

NASA SEWP (Solutions for Enterprise-Wide Procurement) VI. Listing planned. SEWP VI opens November 2026.

SERVICE AND ENGINEERING, PER YEAR UNLESS NOTED

Cellular, per line. Unlimited data and voice with hotspot, plus satellite direct-to-cell messaging. Taxes and account administration included. **\$780**

Satellite messaging, per device **\$240**

LEO broadband, per terminal, 100 GB per month, taxes estimated **\$720**

Device management, per node. Enterprise device management, patching, monitoring and data handling. **\$1,800**

Mission engineering and integration, Phase 1. **\$80,000 once**
One fixed price per organization, any number of nodes. Produces the integration and accreditation package.

Recurring service can be paused between operations, which lowers the annual cost.
